Introduction

This document outlines how a user can configure an option set to cater for products relationships that provide additional product selection driven by primary product. This will guide the user on adding different types of options/attributes to customize a product or a product range. These can be configured and managed through the Attribute / Option Set Maintenance option.

This document will also elaborate on the various ways option sets can be used in a sale transaction. Through which the parent product or the child product can be set individually for each item or both types of products with the following:

- Manual Basket-level Discounts
- Allow Promotions
- Allow Returns
- Allow different prices per item/s
- Allow Single Mixed-rate Tax Calculation per item/s
- Allow Option Sales type per item/s.

Key details and the configuration of each function will be explained in the document and will walk the user through all basic elements of the product option set.

Overview

Following common configurations should be applied to work with the Product Option set.

Product – Product maintenance is where products are configured; and will contain all the required attributes.

Product List – A Product can be listed according to the specific context and includes a set of properties in common.

Option Set – The Option Sets function is used to systematically configure Parent-Child products.

Product Price – Each product may have a retail price assigned to it.

Configuration Steps

Product Maintenance

Products are configured based on a set of specific attributes and characters in the application and identified to the software through a unique **Product ID**. The **Products Maintenance** provides a list of configurable attributes for a product.

The process to configure an Option Product type follows all the steps described for a standard Merchandise Product type.

The Product Maintenance application can be accessed through:
Configurations-> Merchandise -> Products

The screenshot shows the Product Maintenance application interface. At the top, there is a header bar with the title "Product Maintenance" and a close button. Below the header, there are two columns of filters. The left column includes filters for Product ID (Starts With), Product Type (dropdown), Brand (dropdown), Fascia (dropdown), Supplier (dropdown), and Selling Code (Starts With). The right column includes filters for Description (Starts With), Product Group (dropdown), MM Group (dropdown), Range (dropdown), and Supplier Product ID (Starts With). Below the filters, there are buttons for "Apply Filters" and "Reset Filters".

	Product ID	Product Description
	003764	Twilight Shower Gel
	003766	Popcorn Lip Scrub
	003767	100g Sea Spray

At the bottom of the table, there is a pagination bar showing "Page 83 of 21204" and "Page Size 10". Below the pagination bar, there are two buttons: "Create a new Product" (highlighted with a red box) and "Export Products".

To create a new Option Product, select **Create a new Product** on the Product Maintenance page.

Select **Merchandise Product** from the Product Type drop-down.

No selection should be made for **Template**. The creation and use of Templates are covered in a separate How-to Guide.

Enter a unique **Product ID** for this product that can be alphanumeric and contain a maximum of 20 characters.

Product Maintenance

You are adding a new product, please enter the ID:

Product Type	Merchandise Product
Template	-
Product ID	30397934

← Back
+ Create

Select **Create**.

* The Product ID cannot be changed once the Product has been created.

Numerous tabs and sub-tabs are presented under product maintenance. This guide is focused on the core aspects that are required to create Option Products against Merchandise Products and the key tabs considered are General, Prices, Selling Options and Tenders.

Product – General – General sub tab

The General tab has all the basic information that captures the identity of the Product.

Product Maintenance

You are editing Merchandise Product 30397934 : Reading Glasses .

General	Selling Options	Alternative	Tenders	Tax	Merchandise	Prices	Location	Supplier	Attributes	Product Media
----------------	-----------------	-------------	---------	-----	-------------	--------	----------	----------	------------	---------------

General	Label	Information	Product Group	Product Sale Region	Selling Codes	Product Lists
----------------	-------	-------------	---------------	---------------------	---------------	---------------

Product Description*	Reading Glasses	English (UK)
Product Long Description	<p>Reduce eyestrain, anti-blue ray to a great extent. Enjoy your digital time, NO worry about eye fatigue, blurred vision, and headache, let you have a better sleep.</p>	English (UK)
Product Long Description URL		
Product Information URL		
Product External Reference		
Image (Preloaded)	-	Test Image
Image URL		Test Image
Essia		

Set the appropriate values on the **General** tab as follows:

Configuration	Description
Product Description	Enter a user-friendly, meaningful name for the Product that can be alphanumeric with a maximum of 30 characters.
	Select the locale in the second field from a dropdown list of all configured locales.
Product Long Description	Enter a long description of the Product, if necessary, that can be alphanumeric with a maximum of 30 characters.
	Select the locale in the second field from a dropdown list of all configured locales.
Product Long Description URL	Enter a URL pointer to an externally defined, usually HTML-formatted, description of the Product.
Product Information URL	Enter a URL pointer to an externally defined, usually HTML-formatted, set of information of the Product.
Image (Preloaded)	Select the ID of an image from the drop-down list to choose the product display image. Images are managed through Image Maintenance. (This is described in a separate how-to guide)
Image URL	Add a URL that points to an externally stored image.
Product Status	Select an appropriate status of the product from a drop-down list. <ul style="list-style-type: none"> • Live – Indicates that the product is currently available. • Discontinued – Indicates that the product is unavailable. • Suspended – Indicates that the product is terminated.

Product – Prices Tab

The Prices tab has all the price details of the selected Product.

General Selling Options Alternative Tenders Tax Merchandise **Prices** Location Supplier Attributes Product Media

The following prices are defined for this product

	Store	Price Group	Currency	Start Date	End Date	Price Type	Price Change Id	Price Change Type	Price Context	Price
 		United Kingdom	Pounds Sterling	21/07/2021, 00:00		Retail Unit				£89.00
 Add										

Page 1 of 1

Context pricing can be configured for Option Products, for the purpose of configuring a particular parent-child option set. It is also possible to define a single product to have different context prices against different Option Sets.

To add a context price to a specific product, select the **Add** and you will be navigated to the Product Price Maintenance where you can add context price applicable on the selected product.

Product Price Maintenance

Please enter following details for the new Product Price

Product ID	<input type="text" value="30397934"/>						
Location	<input type="text" value="Estate Manager"/>						
Price Group	<input type="text" value="-"/>						
Currency	<input type="text" value="Pounds Sterling"/>						
Start Date	<input type="text" value="22"/>	<input type="text" value="November"/>	<input type="text" value="202"/>	<input type="text" value="..."/>	<input type="text" value="00"/>	<input type="text" value="00"/>	<input type="text" value="00"/>
End Date	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text" value="..."/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Price Type	<input type="text" value="Retail Unit"/>						
Price Context	<input type="text"/>						

Enter a positive numeric value for the product Price Context and select **Save**. You will be taken back to the product maintenance prices tab where the configured product price will be visible with the options to edit or delete.

Product - Selling Options - Option Sets Sub Tab

The option set in the product maintenance should be configured in the option sets tab to make sure that the products are added to complete the parent-child option set configuration.

Allowed Tenders	
-	-
 Add	Cards PDQ UK ▼

In Product Maintenance, the user is enabled configuration of Tenders that may be used to purchase the Product; a list of one or more Allowed Tenders may be associated with the Product.

Select the desired Allowed Tender(s) for this product, from the drop-down list.

Select **Add**.

Product List

A Product List is a collection of products referenced by an ID and a specific Region. Each product ID in the collection (list) is also associated with predefined Product Attributes. (Also referred to as option sets). These products can be considered as child products and be used for option set configuration, which is discussed later in this document.

Product Lists are configured through the Product List Maintenance application on the estate manager.

The Product List Maintenance application can be accessed through:
Configurations-> Merchandise -> Product Lists

The screenshot shows the 'Product List Maintenance' application window. At the top, there's a header bar with the title 'Product List Maintenance' and window controls. Below the header, there are filter fields for 'Group Type', 'Product List ID', and 'Name', each with a 'Starts With' dropdown and an input field. There are also 'Apply Filters' and 'Reset Filters' buttons. The main area contains a table with columns for 'Product List ID', 'Group', and 'Name'. The table lists several entries, including 'RECENTLY_VIEWED_777', 'RECENTLY_VIEWED_ADMIN', and various numeric IDs. At the bottom left, there is a button labeled '+ Create a new Product List' which is highlighted with a red box. The bottom right shows pagination information: 'Page 1 of 12' and 'Page Size 10'.

	Product List ID	Group	Name
	RECENTLY_VIEWED_777	United Kingdom	
	RECENTLY_VIEWED_ADMIN	United Kingdom	
	1	United Kingdom	
	1	United States	
	0005004	United Kingdom	
	0005003	United Kingdom	

To create a new Product List, select **Create a new Product List** on the Product List Maintenance page.

Enter a unique **Product List ID**. The ID can be alphanumeric and contain a maximum of 50 characters.

Select the Group type **Region**, from the **Group Type** drop-down.

Select a region that is applicable from the **Group** drop-down in which the POS terminal is configured. (Can opt to select **All Regions**)

The screenshot shows a 'Product List Maintenance' form. At the top, it says 'Please enter following details for the new Product List'. There are three input fields: 'Product List ID' with the value 'LENS_TYPES', 'Group Type' with a dropdown menu showing 'Region', and 'Group' with a dropdown menu showing 'United Kingdom'. At the bottom left, there are two buttons: 'Back' and 'Create'.

Select **Create**.

* The Product List ID cannot be changed once the Product List has been created.

You will be presented with the following options to complete creating the new product list:

Product List - General Tab

The screenshot shows the 'Product List Maintenance' form with the 'General' tab selected. At the top, there are 'Save' and 'Cancel' buttons. Below them, it says 'You are editing Product List ID: 'LENS_TYPES' for Region 'All Regions''. There are two input fields: 'Name*' with the value 'Lens Types' and a dropdown menu for 'English (UK)'. At the bottom left, there is a note: '* Denotes Mandatory'.

Set the appropriate values on the **General** tab as follows:

Configuration	Description
Name	Enter your product list name in this field which can be alphanumeric and contain a maximum of 40 characters. This name will be displayed in screens and other configuration options. The name is locale dependent. Select the appropriate Locale from the drop-down list.

* You can edit the order of the Product List items using directional arrow buttons. Select the edit icon to navigate directly to product maintenance, which will enable you to edit product details.

Attribute / Option Set Maintenance

Option Sets are used to create user-configurable data entry fields to map a Product and a Product List against an Option Set. The purpose and function of the option set is defined by the Option Set Type. This determines the flow in which the product is added to the basket. The Parent-child relationship configuration will be done under the Attribute/ option set Maintenance.

The Product Attribute / Option Set Maintenance application can be accessed through:
Configurations-> Merchandise -> Attribute / Option Sets

+ Create a new Option Set

When a user maps a product option in the **Option Set** tab under the product maintenance, the defined product will act as a Parent product. This will call the child products by the mapped option set. In the Options set, one or more child products can be configured. This will be done by using either mapping of one product or a product list. A product list will have a range of products that the user can select from.

To create a new Option Set select **Create a new Option Set** on the Attribute / Option Set Maintenance page.

Enter a unique **Option Set ID**. The ID can be alphanumeric and contain a maximum of 40 characters.

Select **Product Options**, from the **Type** dropdown list.

Select the appropriate **Region** from the drop-down list.
