# Introduction

The purpose of this guide is to provide a foundational understanding of the options and capabilities available when configuring Hospitality specific Menus related to product sales and other functions.

This guide will cover the configuration for the following Hospitality specific menus:

- Restaurant Course Menu
- Restaurant Bar Menu
- Restaurant Functions Menu
- Restaurant Bar Functions Menu
- Hospitality Modify Item Functions Menu
- Restaurant Bill Split Menu
- Restaurant Manager Functions Menu
- Restaurant Non-Table Sales Functions Menu
- Restaurant Transaction Notes Functions Menu
- Restaurant Item Notes Functions Menu
- Tender Menu

## Prior Training / Experience

You should be familiar with the following:

- Estate Manager Configuration
- Data Broadcasting

# POS Menus

Enactor Applications that present User Interfaces (UIs) use **Menus** as the principal means to navigate and access functionality of the Application. Menu configuration provides the first level control over what Application Functionality individual Users and groups of Users may access and how they navigate to the functions they require.

Menus are associated with a **Locale**, **User Role** and **Menu Group**. Before configuring menus, the related configuration elements must be understood and configured. From the POS User perspective some POS Menu options select other Menus or refer to software functions. In most hospitality POS Menus, the action behind the Menu Option is an Event; a Function or a Process defined within the constraint of the Menu Set.

## Restaurant Menu Configuration

The Menu Maintenance application can be accessed through:  
Configuration -> System -> Menus

Menu Maintenance

Menu Set:  Role:  Menu Group:  Locale:  Menu ID:  Starts With:

	Menu Set	Role	Menu Group	Menu ID	Name
<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	POS	Sales Assistant - UK - WebPos	Fashion	ADMIN	ADMIN

## Creating a Linked Menu

A linked menu is a series of menus linked to one another to form one large menu. Linked menus can be defined when configuring food menus to be used in the POS application. Before creating the main Restaurant Course menu or Restaurant Bar menu, we should create linked menus for each product category. This would enable to add these linked menus to the main Restaurant Course menu or Restaurant Bar menu which will be configured later.

Following is an example of creating a Linked Menu for the product category Champagne and adding an item to it:

To create a new linked Menu, select **Create New Menu** on the Menu Maintenance page.

You will be presented with the following options.

**Menu Maintenance**

Please enter an ID for the new menu.

Menu Set	POS
Role	Restaurant - UK
Menu Group	United Kingdom
Locale	English (UK)
Menu ID	
	Champagne

[← Back](#) [+ Create](#)

Set the appropriate values on the **Menu Maintenance** screen as follows:

Configuration	Description
Menu Set	This selection determines the basic elements of functionality offered by the Application. Select <b>POS</b> from the drop-down list.
Role	Role provides the necessary permissions to access the function options of the Menu. Select <b>Restaurant-UK</b> from the drop-down list.
Menu Group	This selection allows to identify a set of Menus associated the with Location(s) in which its use is enabled. Select <b>United Kingdom</b> from the drop-down list.
Locale	Defines the defines locale in which the Menu may be used. Select <b>English (UK)</b> from the drop-down list.
Menu ID	Must be a unique ID that identifies an Application Context in which the Menu will be requested. Can contain up to a maximum of 30 alphanumeric characters.

Select **Create**.

You will be presented with the following options to complete creating the new linked menu:

## Menu Maintenance

 Save  Cancel

You are editing menu ID Champagne for menu set POS, role Restaurant - UK, menu group Default Standard POS, locale English (UK)

Create

Select **Restaurant Course** from the Menu ID drop-down list.

Select **Create**.

You will be presented with the following options to complete creating the new restaurant course menu:

The screenshot shows the 'Menu Maintenance' interface. At the top, there are 'Save' and 'Cancel' buttons. Below them, a message states: 'You are editing menu ID RESTAURANT\_COURSE for menu set POS, role Restaurant - UK, menu group US Standard POS, locale English (UK)'. The form contains three fields: 'Name' with the value 'RESTAURANT\_COURSE', 'Menu Type' with a dropdown set to 'Tree', and 'Menu Category' with a dropdown set to 'Retail'. Below these fields is a menu tree where 'RESTAURANT\_COURSE' is highlighted with a red box. At the bottom left, there is a panel with three options: 'Add a new Button Folder', 'Add a new Button' (highlighted with a red box), and 'Add...' (with a red arrow pointing to it).

Enter a **Name** that can contain up to maximum of 20 alphanumeric characters.

Select **Tree** from the Menu Type drop-down.

Select the Menu root **RESTAURANT\_COURSE**, and the menu options will appear at the bottom left corner.

Select **Add**.

From the list select **Add a new Button** to proceed.

You will be presented with the following options:

**Menu Maintenance**

Save Cancel

You are adding a new button to 'RESTAURANT\_COURSE'. Please fill in the button details
